Euphoria (/ juː ɪ f ɔːr i ə / ()) is the experience (or affect) of pleasure or excitement and intense feelings of well-being and happiness. Certain natural rewards and social activities, such as aerobic exercise, laughter, listening to or making music, and dancing, can induce a state of euphoria. Euphoria is also a symptom of certain neurological or neuropsychiatric disorders, such as mania.

Euphoria - Wikipedia

The final treatment volume only includes the initially involved nodes with a margin, typically 2 cm.[36-38] ISRT, used in contemporary COG trials, is an approach to be used for patients when optimal prechemotherapy imaging (PET-CT in a position similar to what will be used at the time of radiation therapy) is not available to the radiation ...
