Biology: Chapter 20 [Viruses and Prokaryotes] Flashcards ...

Bacteria: These single-celled organisms are prokaryotes. Bacteria are living things—they contain DNA, use nutrients and energy, grow and reproduce, and respond to their environment. A virus: is an infectious particle made only of a piece of DNA or RNA surrounded by a protein coat. A viroid: is a piece of single-stranded RNA without a protein ...

Cells, Viruses, & Prokaryotes Chapter 3&18 - *WELCOME*

A typical virus is composed of a core of DNA or RNA surrounded by a protein coat called a capsid. Viruses that infect bacteria are called bacteriophages. They enter living cells and, once inside, use the machinery of the infected cell to produce more viruses. Viral Infections
Viruses have two methods of infection once inside a host cell.
