Geometry Lessons Locus Theorems Locus Theorem 1: The locus of points at a fixed distance,  $d$ , from point  $P$  is a circle with the given point  $P$  as its center and  $d$  as its radius.

### **Loci in Geometry (solutions, examples, worksheets, videos ...**

In two-dimensional locus problems, all the points in the locus solution lie in a plane. This is usually, but not always, the same plane as the given geometric object. You can use the following four-step solution method to solve a 2-D problem. Start with a problem: What's the locus of all points 3 units from [...]

### **How to Solve a Two-Dimensional Locus Problem - dummies**

Locus problems in geometry sometimes involve two or more conditions, as the following examples illustrate. Example 5: If  $A$  and  $B$  are two points that are 2 units apart, what is the locus of points that are 1 unit from  $A$  and 2 units from  $B$ ? Solution: The locus of points that are 1 unit from  $A$  is the circle with center  $A$  and radius 1.
