Bucephalus was the famous and well-loved horse of Alexander the Great. Plutarch tells the story of how a 12-year old Alexander won the horse: A horse dealer offered the horse to Alexander's father, Philip II of Macedonia, for the enormous sum of 13 talents. Since no one could tame the animal, Philip wasn't interested, but Alexander was and promised to pay for the horse should he fail to tame it.

Attached to the horse's halter is a small, copper-colored bell. It lets the blind friend know where the other horse is, so he can follow. As you stand and watch these two friends you'll see that the horse with the bell is always checking on the blind horse, and that the blind horse will listen for the bell and then slowly walk to where the other horse is, trusting he will not be led astray.

Horses are mammals of the family Equidae. They are herbivores, which means they eat grass and other plants. Some plants are dangerous for them like ragwort, lemongrass (oil grass) and sometimes acorns.. The common horse is the species *Equus caballus*. It was domesticated from wild horses by humans at least 5000 years ago. They are large, strong animals, with some breeds are used to pull heavy loads.

The Trojan Horse is a story from the Trojan War about the subterfuge that the Greeks used to enter the independent city of Troy and win the war. In the canonical version, after a fruitless 10-year siege, the Greeks constructed a huge wooden horse and hid a select force of men inside, including Odysseus. The Greeks pretended to sail away, and the Trojans pulled the horse into their city as a ...
