5 This duplex jockey pump controller is designed to alternatively control two jockey pumps (lead & standby) for maintaining the designed water pressure in fire pump serviced systems and therefore prevent short cycling of the

INSTALLATION AND MAINTENANCE MANUAL FOR JOCKEY PUMP ...

(a) For all pump installations, including jockey pumps, each controller shall have its own individual pressure sensing line. (b) The pressure sensing line connection for each pump, including jockey pumps, shall be made between that pump's discharge check valve and discharge control valve. This line

Installation and Operation Instructions - Peerless Pump

B. Manual Operation: To manually start the Jockey Pump Motor, the HOA Selector is in the "Hand" or the On - Off Selector is in "On" depending on the Controller. This will energize the Motor Contactor Coil (MC) and will cause the Motor Contactor Contacts to close, thus starting the Motor.

MANUAL ELECTRIC JOCKEY PUMP CONTROLLER SERIES M-15

shall hook up and test the jockey pump controller as a completed assembly. This test shall include, but not be restricted to, each function the controller may be required to perform including manual start-stop, automatic start-stop and minimum run timing. The manufacturer shall perform a high potential

Product Description Jockey Pump Controllers FTA500

The Jockey Pump, an Important Part of a Fire Pump System. August 1, 2009 Rev. No. 2 A Jockey Pump is an important component of a fire pump system. The Jockey Pump is not as mundane as many engineers, contractors, and installers would ... There are specific installations that are manual rather than automatic. However they are rare.

The Jockey Pump, an Important Part of a Fire Pump System.

A jockey pump is a small pump connected to a fire sprinkler system to maintain pressure in the sprinkler pipes. This is to ensure that if a fire-sprinkler is activated, there will be a pressure drop, which will be sensed by the fire pumps automatic controller, which will cause the fire pump to start.

Jockey Pump | Grundfos

The JOCKEY Touch jockey pump controllers operate across-the-line, where full voltage is applied to the motor for starting by the use of a single motor starter. Starting inrush current is approximately 600% of rated full load amperes.

XTJP Jockey Pump Controllers - Eaton

manual clearly identifies accepted methods for disassembling units. These methods must be adhered to. Never apply heat to aid in their removal unless explicitly stated in this manual. • If the pump or motor is damaged or leaking, electric shock, fire, explosion, liberation of toxic fumes, physical harm, or environmental damage may result.

Installation, Operation, and Maintenance Manual - Goulds Pumps

Jockey pumps or sprinkler system pressure maintenance pumps are a low cost yet essential component of a fire pump sprinkler system. Typically the jockey pump is sized to 1% of the fire pumps rated flow. There are several types of jockey pumps each having their advantages to a given application.

Jockey Pumps | AC Fire Pump

Our JPC Jockey Pump Controllers are UL listed, full voltage combination motor controllers with built-in pressure switches. They are designed to automatically start and stop pump-motor assemblies ranging from 1/3 to 7.5 horsepower. They are typically used in fire pump systems.

JPC - Jockey Pump Controller

The JOCKEY Touch jockey pump controllers operate across-the-line, where full voltage is applied to the motor for starting by the use of a single motor starter. Starting inrush current is approximately 600% of rated full load amperes. They are equipped with a microprocessor based, color touchscreen which allows the user to monitor and program all functions and values.
