Fundamentals of-power-system-economics-solution-manual

so the units for the price of power are the same as for the price of energy. Typically the price of retail energy is about 8¢/kWh.3 At that price, the price of power would be 8 cents/hour for a kilowatt of power flow, which is the same. These units are convenient for home use but are inconveniently small for bulk power systems.

Power System Economics

Updates end-of-chapter problems and accompanying solutions manual; Fundamentals of Power System Economics, Second Edition is essential reading for graduate and undergraduate students, professors, practicing engineers, as well as all others who want to understand how economics and power system engineering interact.
