Edition 2 of the STANAG is backward compatible with Edition 1. Standard Abstract. 2008-03-27 The STANAG 4607 GMTI Format (GMTIF) standard defines the data content and format for the products of ground moving target indicator radar systems. It also provides the mechanism to relay tasking requests back to the sensor system. The format is scalable to allow all types of radar systems to use the ...

About This Standard - National Geospatial-Intelligence Agency

In NATO, a Standardization Agreement (STANAG, redundantly: STANAG agreement) defines processes, procedures, terms, and conditions for common military or technical procedures or equipment between the member countries of the alliance. Each NATO state ratifies a STANAG and implements it within their own military. The purpose is to provide common operational and administrative procedures and ...

Standardization Agreement - Wikipedia

A STANAG is a normative document that records an agreement among several or all NATO member states – ratified at the authorized national level – to implement a standard, in whole or in part, with or without reservation. NSO website
